Adam Gordon

Full Stack Developer

Professional Summary

Full Stack Developer / Software Engineer with nearly 3 years of practical experience, with a growth mindset to consistently produce the absolute best of my ability. Looking for a position in which my unique attributes and perspective can thrive. Specialized in Full Stack Development and Server Side Rendered Applications such as Next.JS, Laravel, and .NET Core, with expertise in

Work Experience

Full-Stack Developer   **JavaScript Mastery / Dev Today (remote)**
February 2024 - July 2024

New York, USA

- Developed a Social Media site for Computer Programmers, with multimedia capabilities and ability to organize meetups as the site's main functions.
- improved performance of complex queries from 20 seconds to 1 second using raw SQL queries and server actions
- Built a dynamic audio player for simultaneous browsing and listening.
- Participated in code reviews and delivered technical presentations

Full Stack Developer   **Diam International**
July 2022-December 2022

Hauppauge, NY

- Built a new authentication system allowing external customers to access business data, enhancing security and user access.
- Collaborated with other departments to process data and push it out to the customers quickly, increasing productivity for team members.
- Programmatically configure time tracking software, improving payroll process efficiency.
- Independently maintained the company database and server, ensuring continuous and reliable service.

Project Manager/ Web Developer Lead Intern   **Cowan Consulting LLC**
January 2022-January 2023

Brooklyn, NY (remote)

- Refactored an incomplete project into a React Application, enhancing code quality and project viability.
- Trained and supervised 8-10 interns, fostering a collaborative learning environment and ensuring successful project handover.
- Took initiative to ensure new team members were adequately trained, improving overall project execution and continuity.

Education and Certifications

- **JSM Masterclass Experience** **2024**
- **JSM NextJS Pro Course** **2023**
- **B.Sc. Computer Science** SUNY Farmingdale , 3.81 Major GPA, 3.31 cumulative **2019-2022**

Projects

Full Stack Developer [Dev Today](#) **April 2024-June 2024**

- Collaborated with a team to create a comprehensive social media website using NextJS, Prisma ORM, Supabase, Clerk for authentication, Tailwind, and ShadCn for styling, demonstrating teamwork and full-stack development capabilities.
- Implemented server-side rendering, query strings, and dynamic content filtering using Framer Motion for animations, improving technical proficiency in modern web development frameworks.
- React Hook Form for complex forms and validations, performing server actions whenever possible to take advantage of NextJS's capabilities. Developed UI friendly forms with a Rich Text Editor(TinyMCE)
- Designed onboarding and auth systems, comprehensive UI, and in-browser audio player, showcasing versatility in front-end and back-end development.

Full Stack Developer [GitNote](#) **2024**

- Developed a knowledge repository for computer science education and career growth, using NextJS, MongoDB, NextAuth v4, Shadcn-UI for a component library, react-hook-form for form submission and validation, with SSR and query strings for specific searches.
- Worked solo from a Figma design with guidance from a senior developer to review code.
- Improved SEO support and page loading times with Next.js 13's server-side rendering, showcasing performance optimization skills.
- Worked independently from a Figma design with senior developer guidance for code reviews, demonstrating ability to take initiative and seek feedback.

Full Stack Developer [Dev OverFlow](#) **2023**

- Developed a Stack Overflow like site that utilized MongoDB, OpenAI's API, and Tiny MCE to be able to read code syntax inside posts.
- Allows developers to communicate and collaborate to solve problems, as well as take advantage of new AI technologies to assist in coming to the correct answer, demonstrating adaptability and ability to integrate new technologies.
- Clerk Auth, MongoDB, NextJS w/ Tailwind as primary stack.

Technologies , Languages, Soft Skills/Attributes

- NextJS, NuxtJS, Laravel, HTML, Css/Tailwind, React, Framer Motion, Vue 2 and 3.0, TypeScript, Javascript, Android apps. C# and Java experience as well.
- Have worked with SQL and NoSQL databases both extensively.

- External tools : Github Workflows, hosting a site on a blank VPS. Docker, Linux, Figma, Asana, Trello, Agile Development ●
Integrating and building APIs - Audio/video Web API's,Google, RapidAPI, OpenAI, etc.
- Previous stint doing sales and customer service, I have a growth mindset, a foundation of empathy with a focus on strong
communication between team members.
- Proficient with multiple design patterns, most recently MVC (via Laravel) and NextJS14+ with the App router and React
Server Components, RESTful patterns, GraphQL, DTOs , etc.

Awards Honors and Certifications

- [JSM Masterclass](#)
- [NextJS Pro Course Certification](#)
- President's List and Dean's List
